

AI-Enhanced Executive Summary

We're excited to introduce a new beta feature in vPenTest: the AI-Enhanced Executive Summary. Designed to make your assessment results easier to understand and share, this summary adds high-level context and strategic insights to your reports. It's perfect for leadership, compliance teams, or anyone who wants a quick, clear overview without the technical deep dive.

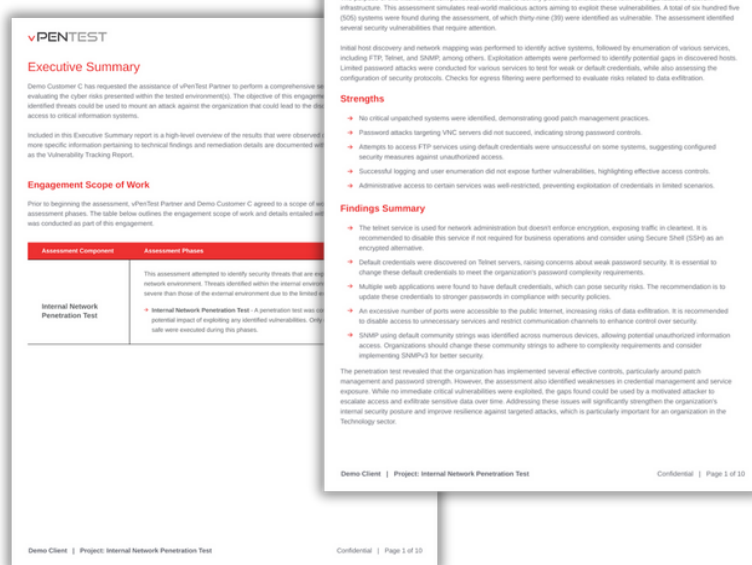

MAKE SMARTER, FASTER SECURITY DECISIONS WITH STRATEGIC INSIGHTS

This AI-powered report is crafted to help decision-makers, stakeholders, and non-technical readers better understand the overall impact of a network penetration test. It expands on the standard executive summary by using AI to deliver additional strategic value, including:

- Greater context around the outcomes of the assessment
- A clearer breakdown of key activities performed at a high level
- A more insightful view into the strengths and areas of concern in the tested network environment

AI-ENHANCED VERSION

REGULAR VERSION

HOW IT WORKS

- 1 Schedule an Assessment
- 2 In Step 1, check the box: "Enable AI-Enhanced Executive Summary"
- 3 Complete scheduling as usual
- 4 After the assessment completes, download the AI-enhanced PDF from the Reports page

Privacy-first: No sensitive data is used. Only high-level, non-identifying information like asset categories and general findings is processed. The process aligns with our secure data handling practices.

Start using our AI-Enhanced Executive Reports to deliver clearer insights and smarter decisions!
